

Intermediate Schedule Judges and Pilots Notes

The primary purpose of this class is to continue the development of the pilot's proficiency and skills to:

- Fly straight and level paths with incorporated manoeuvres
- Proper wind correction - maintaining straight path flight parallel to the runway during manoeuvres and within the 140m to 170m corridor
- Maintain wings level attitudes
- Fly straight, wind corrected vertical lines with incorporated manoeuvres
- Fly accurate up and Down Line angles
- Safely fly basic inverted flight
- Consistent positioning of manoeuvres (centering and turnaround locations)
- Perform repetitive manoeuvres with precision
- Perform basic and more complex individual precision manoeuvres
- Fly proper entry/exit lines for manoeuvres
- Focus on flying the airplanes CG (rudder to maintain constant track)
- Learn centering of basic elements within the manoeuvres
- Learn to fly in a full turnaround environment and recognize the impact of the "box" on flight pace and planning for upcoming manoeuvres
- Learn the need for consistency of presentation.
